PROFESSIONAL SUMMARY

Senior Backend Engineer with 5+ years of experience building enterprise-grade systems across fintech, banking, and government sectors, now specializing in DevOps and cloud infrastructure. Proven track record designing CI/CD pipelines, containerized microservices, and automated deployment workflows supporting 2M+ users. Strong foundation in .NET development combined with hands-on expertise in AWS, Docker, Kubernetes, Terraform, and observability platforms. Passionate about building reliable, scalable systems through automation and infrastructure as code.

CORE TECHNICAL SKILLS

DevOps & Cloud:	AWS (EC2, EKS, ECR, IAM), Azure (DevOps, Cloud), Docker, Kubernetes, OpenShift, Terraform, ArgoCD, GitHub Actions, CI/CD Pipelines, Linux Administration
Monitoring & Observability:	Datadog, Prometheus, Grafana, Alerting Systems, Performance Metrics, Dashboard Creation, Log Aggregation
Backend Development:	.NET Core, .NET 9.0, C#, WebAPI, RESTful Services, Microservices Architecture, Async Programming
Data & Databases:	SQL Server, PostgreSQL, Oracle, MySQL, Redis (Caching), Query Optimization, Database Performance Tuning
Tools & Scripting:	Bash Scripting, Git (Version Control), sed/awk, Infrastructure Automation, GitOps

PROFESSIONAL EXPERIENCE

First Bank Nigeria – Lagos, Nigeria

Backend Engineer | April 2024 – Present

- Architecting and deploying containerized .NET microservices using Docker and Kubernetes, improving deployment efficiency and system scalability for enterprise banking applications
- Building and maintaining CI/CD pipelines in Azure DevOps, automating build, test, and deployment workflows to accelerate release cycles and reduce manual errors
- Implementing monitoring and observability solutions using Datadog and Application Insights to track system performance, uptime metrics, and proactively identify issues
- Developing high-performance backend services for core banking operations including payments processing, account management, and transaction workflows

- Collaborating with DevOps and platform teams to implement infrastructure automation and GitOps practices across development environments

Tech Stack: *.NET Core, C#, Docker, Kubernetes, Azure DevOps, Datadog, SQL Server, CI/CD, Microservices*

Digital Witch NG

Cloud Infrastructure & Automation Engineer | July 2025 - December 2025

- Designed and implemented end-to-end CI/CD pipelines using GitHub Actions that build Docker images, push to AWS ECR, update Kubernetes manifests with sed automation, and trigger ArgoCD deployments
- Developed Infrastructure as Code (IaC) using Terraform to provision AWS resources including EC2 instances, IAM roles, security groups, and EKS clusters with version-controlled configurations
- Implemented GitOps workflows with ArgoCD for continuous delivery to Kubernetes, enabling automated rollbacks and declarative cluster management
- Configured Prometheus for metrics scraping and Grafana for real-time dashboard visualizations, integrated with Datadog for comprehensive alerting and APM insights
- Automated deployment workflows using Bash scripts, reducing manual configuration time by 70% and ensuring consistency across dev, staging, and production environments

Stanbic IBTC Bank – Lagos, Nigeria

Software Engineer | September 2023 – April 2024

- Developed containerized backend microservices with .NET 9.0, Docker, and OpenShift, improving system reliability for 2M+ active banking customers
- Contributed to CI/CD pipeline development in Azure DevOps, automating deployment processes and reducing manual intervention by 60%
- Integrated Datadog dashboards to track critical system metrics, application uptime, and performance KPIs for real-time monitoring
- Engineered core banking modules including QR Payments, Transaction Limits, and Recurring Transfers, handling 500K+ daily transactions with 99.9% uptime

Tech Stack: *.NET 9.0, Docker, OpenShift, Azure DevOps, Datadog, Oracle, CI/CD, Microservices*

Maxfront Technologies – Remote

Backend Engineer | March 2023 – September 2023

- Optimized backend performance for OGISP and HostComply platforms, achieving 35% improvement in API response times through Redis caching implementation and async query optimization
- Performed database performance tuning and query optimization, reducing database load by 25% and improving overall system throughput
- Contributed to environment setup and deployment automation for internal projects, streamlining development workflows

Decagon Institute – Lagos, Nigeria

Software Engineer | November 2022 – June 2023

- Automated internal developer workflows by creating build and deployment scripts, reducing setup time for new projects by 50%
- Developed backend modules for fintech applications using .NET Core and PostgreSQL, implementing RESTful APIs and microservices patterns

EDUCATION

Bachelor of Science in Statistics

CERTIFICATIONS & TRAINING

- Cloud & DevOps Training (AWS & Azure) – December 2025
- Scrum Fundamentals Certified
